

How to Install Mirrors

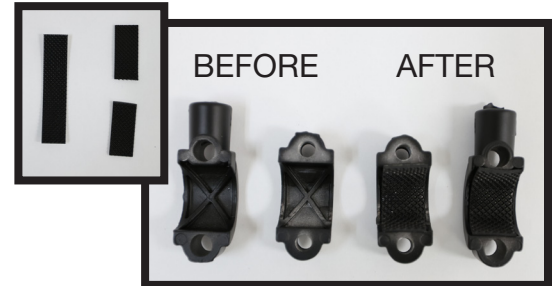

- 1** Find the bag with 2 mirror handlebar mounts and protective strips

- 2** Remove the 8mm bolts from the mounts

- 3** Cut in half the protective strips and place half on each side of the of the mount. Peel back the white backing to stick protective strips to inside each mounting half.

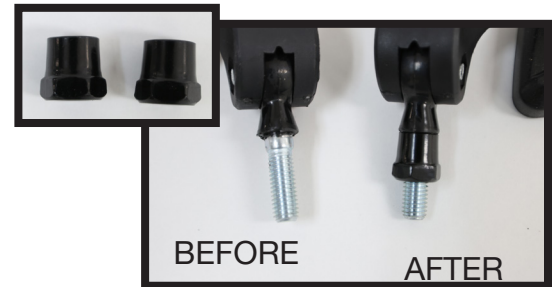

- 4** Place handlebar mounts on each side of the handlebar in desired spot.

- 5** Thread in 8mm bolts working top to bottom as they are being tightened. (Using the wrench provided)

DO NOT OVER TIGHTEN.

- 6** Find the black 14mm bolts with tapered ends and thread them on the bottom of the mirror's post.

- 7** Thread mirrors into the handlebar mounts

- 8** Adjust mirrors to have a good view of behind you.

- 6** Tighten the 14mm bolts to lock in mirrors in position. (Using the wrench and allen key provided)
